# Aantor Kar

+91-7003412366 aantor.kar10@gmail.com LinkedIn GitHub LeetCode

## Education

**National Institute of Technology Agartala** **2024 – Present**
*Bachelor Of Technology in Electronics and Communication Engineering* *CGPA: 8.91*

## Technical Skills

**Programming:** Data Structures and Algorithms, Object-Oriented Programming, Problem Solving

**Languages:** C++, C, Python, JavaScript, TypeScript

**Frontend:** React.js, Next.js, HTML, CSS, TailwindCSS, Vite

**Backend:** Node.js, Express.js, REST APIs, Authentication, Authorization, Prisma ORM, Webhooks

**Databases:** MongoDB, PostgreSQL, Relational Databases

**Development:** Full Stack Development, Web Application Development

**Tools & Platforms:** Git, GitHub, Docker, VS Code, Vercel, Stripe API, Gemini AI APIs

## Experience

**OutriX** **Jun 2026 – Jul 2026**
*Full Stack Development Trainee*

- Completed a one-month practical training program, building small full-stack projects.
- Implemented backend authentication, authorization, protected routes, and backend to frontend integration.

## Projects

**Full-Stack E-Commerce Website** — Live Demo — Admin Panel — GitHub

- Engineered a full-stack e-commerce application featuring authentication, product catalog management, cart persistence, and secure payment workflows.
- Established role-based access control and an administrative dashboard for inventory tracking and order processing.
- Architected and integrated RESTful APIs with Express.js and MongoDB to support scalable business logic and data operations.
- Crafted a responsive user interface using React and TailwindCSS and deployed the solution on Vercel.

**AI Resume Builder** — Live Demo — GitHub

- Created an AI-powered resume generation system with template customization, live preview, and dynamic content editing capabilities.
- Leveraged Gemini AI to automate resume writing and enhance content generation workflows.
- Constructed scalable server-side functionality and relational data models using Next.js API Routes, Prisma ORM, and PostgreSQL.
- Optimized user experience through streamlined resume creation, modification, and export processes.

**AI Website Builder** — Live Demo — GitHub

- Built an AI-driven website generation system capable of transforming natural language prompts into functional web applications.
- Introduced project workspaces, code visualization, and community-sharing features to improve collaboration and usability.
- Implemented project persistence and user management functionalities for reliable application performance.

## Achievements

- Solved 200+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks, covering arrays, linked lists, trees, graphs, recursion, and dynamic programming.
- Selected among the top 50 teams in SIH Internal Hackathon 2025.
